

* Which region are you from? Please select first you country, then you region.

Regions are regarded as the new powerhouses for innovation and adoption of personalised medicine. They will drive the transition towards sustainable healthcare and personalised health.

The Assembly of European Regions (AER) defines region as a territorial authority existing at the level immediately below that of the central government, with its own political representation in the form of an elected regional assembly.

Often these regions better reflect culture, identity and a sense of common interests. Regions are, therefore, well placed to bring personalised medicine and healthcare closer to the citizen.

Finland (FI)

You selected Finland, which region are you from?

- Länsi-Suomi (FI19)
- Helsinki-Uusimaa (FI1B)
- Etelä-Suomi (FI1C)
- Pohjois- ja Itä-Suomi (FI1D)
- Åland (FI20)
- Finland (National level) (FI)
- Other

Organisations responsible for the different competences related to Personalised Health at national, regional and local level

Policy is seen as strategic planning and legal legislative law writing.

Regional is mostly on NUTS2 except :

CY, EE, LT, LU, LV, MT, SI on NUTS0;

BE, DE, FR, UK on NUTS1

Local is seen as the level under regional, mostly NUTS3 except:

CY, EE, LT, LU, LV, MT, SI on NUTS1 (or below);

BE, DE, FR, UK on NUTS2 (or below)

Don't hesitate to add in the comment field how you see the regional & local level

Do you have any additional remarks related to the organisation of the competences in your region/country?

Ministries also provide direct funding opportunities for some activities.

Biocenter Finland (www.biocenter.fi) is a national umbrella organization of bioscience research infrastructures covering many universities in Finland, including the ones in our region. Biocenter Finland coordinates and centrally applies for some funding for its member infrastructure platforms.

Business Finland's fundings for innovations have been significant in regionally and nationally
