Do you have any additional remarks related to the organisation of the competences in your region/country?

Tuscany Region promotes health research and innovation policies to structure an integrated and synergistic research and innovation system in a coordinated context among Tuscan university hospitals and other institutions of the Regional Health Service.

Main activities in this field:

- calls for funding (using regional, national e structural funds);
- creation of UVaR - office for exploitation of research results – that is engaged in assessing, monitoring and exploiting the results of research in terms of applicability and transferability. An activity to support the Tuscan university hospitals and other institutions of the Regional Health Service, universities and public research organizations in order to develop and leverage innovative capacity and technology transfer, also through the creation of collaborative channels with companies and other stakeholders in the Life Sciences sector;
- Support to Tuscany Life Sciences Cluster, founded in 2011 by an initiative of the Tuscany Region aimed at creating an integrated Life Sciences system. Its mission is to act as the “glue” between the specialist industrial dimension and the institutional and systemic one, promoting dialogue among companies and the network of excellence present in the field of research and technology transfer in the region
