In addition to the governmental structures, organisations like Cluster operate in the Q-helix innovation approach (see <https://sportsandtechnology.com/>). Cluster Sports & Technology has a mandate of the regional managing authority to represent them in given issues like on the theme of innovation and business creation for Sports & Vitality. Cluster Sports & Technology is e.g. the leader of Inno4Sport project ((Interreg Europe) and co-leader of ClusSport (the Smart Specialisation platform for Sports& Vitality) on behalf of the managing authority of South Netherlands.
